

HOW-TO: TREAT MUSTARD ALGAE

Courtesy of Arch Chemicals w/ Johnson Pools and Spas

Mustard Algae Treatment (Chlorine Pools Only)

Treats and controls yellow/ mustard deposits in pool water. Pool Life granular formula works with chlorine to effectively control these deposits.

Benefits

- Specially formulated for yellow algae's slow growth
- Granular formulation clears cloudy water quickly
- Even works in pipes and filters
- Will not affect water quality
- Allows for swimming in just a few hours

Mustard Algae Removal:

1. Thoroughly brush areas that have yellow or mustard deposits.
2. Apply 4 oz per 10,000 of Pool Life Mustard Algae Treatment as close to the affected areas as possible. For severe accumulation, double the dosage.
3. Wait 5 minutes and add 1 lb shock per 10,000 around the entire pool.
4. Add stain prevention to prevent non-metallic deposits and to maintain water clarity (follow label directions)
5. Wait at least 3 hours before swimming.
